## 1. Consolidated Performance

# (1) Performance Overview of the Consolidated Fiscal Year under Review

## (January 1, 2020–December 31, 2020)

In fiscal 2020 (January 1, 2020–December 31, 2020), the Japanese economy remained harsh due to the spread of the novel coronavirus, which led to a substantial decline in corporate profits, deterioration in employment conditions and other negative developments.

In domestic consumer products, the Lion Group's main business, demand associated with inbound tourism decreased due to a decline in the number of overseas visitors to Japan. However, the overall market expanded due mainly to growing demand for hygiene-related products.

Lion advanced measures based on the basic strategies of its medium-term management plan, the LION Value Evolution Plan (LIVE Plan). These basic strategies are "Expand and Evolve Our Business Domains through New Value Creation," "Accelerate Growth in Overseas Businesses through Glocalization," "Reinforce Our Management Base through Business Structure Reform" and "Create Dynamism to Foster Innovative Change." At the same time, the spread of the novel coronavirus (COVID-19) impacted Lion's domestic and overseas businesses. To meet its social responsibility, the Lion Group strived to maintain its product supply while making every effort to prevent the spread of the virus and ensure the safety of its employees.

In its domestic operations, Lion introduced new, high-value-added products in its mainstay brands and worked to cultivate markets for these products through efficient marketing initiatives.

In its overseas operations, in addition to efforts to increase profitability in the home care field, which includes such products as laundry detergents, the Group sought to expand its business in the personal care field, which includes oral care and beauty care products.

Reflecting these efforts, consolidated results for fiscal 2020 are as follows. Net sales amounted to ¥355,352 million, a year-on-year increase of 2.3% (or 3.2% at constant currency excluding exchange rate fluctuations). Core operating income came to ¥35,937 million, up 19.6% compared with the previous fiscal year, and operating profit to ¥44,074 million, up 47.7% year on year. Profit for the period attributable to owners of parent totaled ¥29,870 million, up 45.3% compared with the previous fiscal year.

## 3. Basic Policy on the Distribution of Earnings and Cash Dividends

Lion considers returning profits to shareholders on a continuous and stable basis by increasing its consolidated earnings capacity to be one of its most important management issues. To this end, the Company strives to ensure the payment of continuous and stable cash dividends, aiming for a consolidated payout ratio of 30%, and bases the acquisition of treasury stock on comprehensive reviews to ensure that it maintains levels of internal reserves required to secure medium- and long-term growth. Lion allocates internal reserves to research and development, capital investment in production facilities and the acquisition of external resources, aiming to reinforce the Company's growth potential and to develop a sustainable business foundation.

Taking into consideration the Company's cash dividend payment record, as well as its dividend payout ratio target, Lion's Board of Directors resolved to pay an interim dividend of ¥11 per share (payment date: September 4, 2020) and a year-end dividend of ¥12 per share (payment date: March 2, 2021) for fiscal 2020.

#### C. Plan asset management policy

The pension assets held by the LION PENSION FUND account for approximately 60% of the Group's plan assets. Management of the LION PENSION FUND's pension assets is aimed at securing the necessary total returns over the long term to ensure the payment of the defined benefit obligation going forward. Specifically, the Group manages such assets by considering factors that include the expected rates of return, risk and combinations of investment assets to determine an investment asset mix that will be optimal into the future and then maintaining this mix. Every year, the asset mix is evaluated, and if the conditions upon which it was formulated have changed, it is revised as needed. At present, in light of the fund's highly mature financial status with retirement benefit payments greatly exceeding revenues from premiums, the fund is managed in a relatively low-risk manner with an asset mix focused primarily on bonds.

The retirement benefit trusts set up for the defined benefit corporate pension plans operated by the LION PENSION FUND at the Company and the lump-sum retirement benefit payment plans maintained by the Company account for approximately 40% of plan assets. The Company's strategically held shares account for the majority of the assets in these retirement benefit trusts. The investment profitability of each such stockholding is recognized as cost of capital and other items, and the Company's Board of Directors examines the economic rationality of each such stockholding on an annual basis.
